

# POCKETSAN

SANI-99™

**Great for sanitising your hands, surfaces, door handles – anything!**

PocketSan is a unique and handy product to have in your pocket or purse for when you need a quick squirt of sanitiser. Its convenient design makes it easy to place and carry in a purse, briefcases or front pocket. PocketSan is a great tool often used by travelers concerned about things like hotel room/bathroom sanitation, areas in toilets on a plane or train and public toilet seats.

## **POCKETSAN:**

- Refillable - Think Green
- Portable & Convenient
- Sanitiser on the go
- You can refill it yourself

**Mini hand sprayer, perfectly portable on-the-go companion.**

NanoSan's convenient design makes it easy to be carried around or placed in a car cup holder, home, and office table. It's a great tool often used by travellers as it is portable.

**NANOSAN:**

- Micro USB for recharging
- Ambient light
- Air dry
- Fits in a cup holder (suitable for car, office and home)
- 80mL solution capacity
- Humidification
- Portable 780x110mm

## Build a germs free space with SaniGun.

The SANI-99 SaniGun was designed to sterilise and purify any surface without the need of wiping things down with a cleaning cloth. With a battery and power option available, you can conveniently carry and disinfect every corner and curve of your environment. As SANI-99 Surface Atomiser comes with a refillable canister, there's no need to purchase a new canister when the disinfectant runs out.

### SANI-99 Gun:

- Sterilisation & purification
- Self-contained rechargeable battery (charger included)
- Refillable 480ml canister
- User friendly High fog coverage
- High fog coverage

## The hand sanitising station with a difference.

Techsan is the cost-effective, environmentally responsible, easy way to effectively provide long-lasting protection from bacteria and virus transmissions.

Techsan is made up of two key components: the freestanding, ergonomic unit which is easy to use, operate and install; and SANI-99, an alcohol-free disinfectant and sanitiser in powder form, which is easily made by the end-user just by mixing it with tap water. This unique design results in an overall solution that is environmentally responsible, user-friendly, and cost-effective.

# TECHSAN THREE SIZES AVAILABLE

SANI-99™

TECHSAN MINI

TECHSAN MEDIUM

TECHSAN LARGE

## PRODUCT FEATURES

- Battery and power options
- Includes batteries
- Slimline & compact for wall, bench or stand mounting
- Wall mount bracket or use the supplied 3m strong adhesive tape or Velcro for kitchen wall mounting.
- Can come in a kit with batteries, adapter & SANI-99 – DIY & ready to go in 5 mins.
- Battery life = 21,000hrs
- Spray life = Approximately 600 SANI-99 sprays (700mL capacity)

## PRODUCT FEATURES

- Equipped with 3 infrared patented smart-tech sensors to detect hands from any angle
- Equipped with 2 spray nozzles for maximum injection volume
- Equipped with a soft BLUE LED Light – for easy night visibility
- Equipped with low noise micro fan motor
- Chamber for hands is constantly being disinfected
- Automatic solution spray
- Easy to move and install – via carry/grab side handles
- Adjustable drying time and injection volume – accurately provides desired solution amount, allowing for true costs to be calculated
- Refill alert function light
- 12 month warranty against any manufacturing defects
- Low maintenance required
- Only use Techhealth-approved disinfectant solution which is alcohol free: SANI-99
- Refillable container for solution

## Portable and effective infection control system.

The Fogger is good to provide you a clean and disinfected environment. Simple operation makes it user-friendly. This product uses aerial spraying pulse technology, reliable quality, low failure rate, easy to learn and operate. At present, this machine is the most lightweight, with only 10kg weight.

### FOGGER:

- 16 Litre solution capacity
- Portable 130 x 27 x 35.5cm (Weight 10kg)
- Water mist mix can reach 7-8 meters and is suitable if fire alarms are fitted
- Fog glycerine mix (smoke fog mist) can reach 30-50 meters and is suitable for use where electrical goods are in use
- Lithium battery for electrical start
- Petrol operated
- Suitable for any non-powered location

# INTELL FOGGER

SANI-99™

## Portable and effective infection control system.

An all-in-one handheld unit, the 'Intell' Fogger rapidly disinfects large and hard to reach areas – even outdoors. It is ideal for halls, lobbies, function rooms, offices, bathrooms, vehicles, and communal public areas. The fine atomised fog binds to rough or smooth surfaces quickly and evenly, and even works on fabrics!

### FOGGER:

- 16 Litre solution capacity
- Portable 130 x 27 x 35.5cm (Weight 10kg)
- Water mist mix can reach 7-8 meters and is suitable if fire alarms are fitted
- Fog glycerine mix (smoke fog mist) can reach 30-50 meters and is suitable for use where electrical goods are in use
- Lithium battery for electrical start
- Petrol operated
- Suitable for any non-powered location

# CONTAINER

SANI-99™

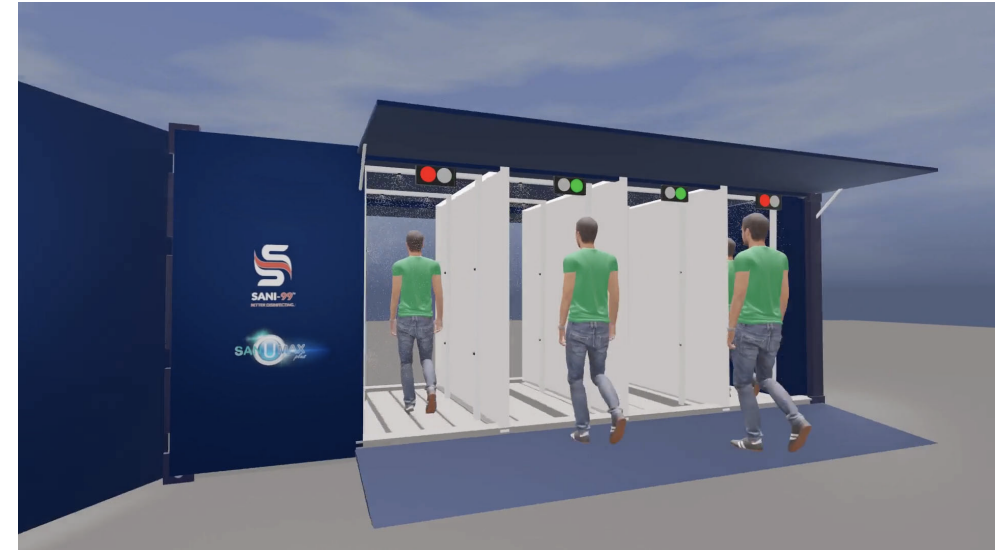

## Walk-through sanitising booth.

Based on a 20ft shipping container, this industrial multi-tunnel sanitizing unit is fitted with a dual door on either side, which can be closed during transport or when not in use by means of a hydraulic system. The bottom section drops down and forms part of a ramp, with the top section becoming a canopy.

4 walkways, separated with steel square tubes joined by division panelling. These hold the sanitizing nozzles and its required components.

Our ergonomically designed floor structure regarding this section consists of slightly dome-shaped treated metal sheets finished in a non-slip surface coating, ensuring sufficient run-down of any excess sanitizer. Draining of such liquids occur via an inter-connected channelling system below the floor sheets, gravitationally guided to the pump station from where it will be pumped into an additional smaller container for easy discarding.

Sanitizing pressure is generated by an industrial grade pump system which is able to spray approximately 18000 walk-through participants. It is also equipped with a safety run-dry protection system that will shut down the pump should the chemical vessel run empty. In addition to a Siemens text display, an indication light and/or alarm will notify the operator timeously, allowing for quick and easy replenishment of sanitizing liquid.

## Modified 20ft Shipping Container with:

- 4 x Sanitizing Walkways
- Single Pump Station
- Aluminium Sheet Ramps with Non-slip coating
- Aluminium Flooring with Non-slip coating
- Pneumatic Air Cylinder Lift system
- Compressor
- 2 x Flow-bin Vessels
- 15 Spray Jets per Walkway
- Divisions
- Draining System with Bilge-pump
- IP65 Lighting
- Advanced Control Panel
- Chemical Tank Indicator
- Siemens Text Display
- Advanced Photo Cell Sensor
